

ANNUAL UPDATE FROM ETE REMAN

What's new in the world of REMAN in 2025 and BEYOND!

WORTH THE W8! LAUNCH OF 8L90/45

We don't just build transmissions—we build confidence.

After five years of prep, training, and investment, ETE REMAN's new line of 8-speed transmissions is finally here, and man were they *Worth The W8!*

Each unit is remanufactured with precision torque tools, rigorously tested (solenoids and all), and backed by a 3-year, unlimited mile warranty.

We tackled common 8-speed failures head-on, upgrading valve bodies and restoring shift performance to make sure your customers get smooth, reliable drives.

Bottom line: these 8-speeds are engineered to outperform—and built to last.

*Read More on
the ETE REMAN
Difference*

WHY DOES IT MATTER?

Fewer Failures:
Precision torque and
real-world dyno testing.

Smoother Shifts:
Common 8-speed issues
fixed at the source.

Worry-Free Warranty:
3 years. Unlimited miles.
No catch.

LOGISTICS POWER THE FUTURE

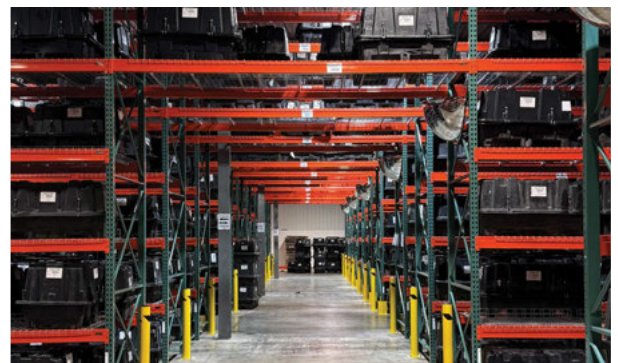

***A Sneak Peek into ETE REMAN's NEW Warehouse
and Logistics Facility, Future 3PL Locations***

At ETE REMAN, we're investing in logistics that move the needle—and your transmissions—faster.

Our brand-new Milwaukee warehouse and logistics facility is up and running with 50% more space, nearly double the storage, and streamlined operations that bring our shipping and core receiving teams under one roof.

But we're not stopping there. In 2025, *Project Satellite* kicks off with three new regional distribution centers strategically located throughout the US, bringing our top 25 SKUs closer to the customers who need them most. That means up to three days faster transit times, quicker installs, and less downtime.

More space. More speed.
More reasons to trust ETE REMAN.

BETTER FOR YOU!

Faster Delivery:

Get your transmissions up to three days faster!

Better Availability:

More space = more in-stock units, ready to ship.

Streamlined Operations:

Efficient shipping means fewer delays and smoother service.

RAMPING UP PRODUCTION ON 6L80/90

We know 6-speeds are the most in-demand reman transmissions on the market—and we're committed to building them **better, faster, and more efficiently** to be a trusted partner for our customers.

Our high volume 6L line is cranking out a reman every **3.5 minutes**, and we're on track to hit 2.5 with future improvements.

We've invested in automation across the board—from torque tools with **positioning sensors** for perfect fastening, to a **conveyor system** that keeps the right parts flowing smoothly. Even our **paint process** is now **automated**, using less paint and protecting our team from harsh chemicals.

It's **smarter, safer**, and built to deliver the **quality and consistency** your shop can count on.

WHAT TURNING UP THE VOLUME MEANS FOR CUSTOMERS:

Faster Turnaround:

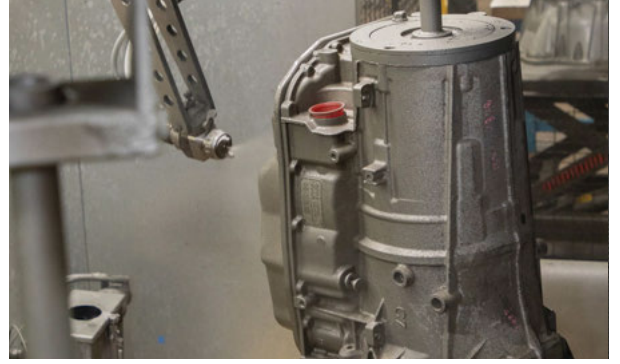

More 6-speeds off the line means less waiting.

Consistent Quality:

Automation and torque tools ensure every unit meets our standard.

Smarter Systems:

Organized parts flow = getting it right for smoother installs.

So, what's on the horizon?

SO GLAD YOU ASKED!

When planning for future improvements, we let customer feedback be our North Star —and what's next on our production line makes a big difference for **quality, safety, and reliability**.

Soon, every unit will undergo **leak testing** before it leaves the line, so you can install with even more confidence.

New **AI-powered vision systems** will double-check part placement and catch potential issues before they become problems.

And to protect the people behind the product, we're adding **lift-assist devices** to handle heavy components with ease.

It's all part of our commitment to building transmissions that are ***Like New, Only Better***—now and in the future.
